

DYE SUBLIMATION PAPER – Premium 3 Layer Formula

Heat Transfer Paper & Application

Packing

APPLICATIONS

- Apparel -- lycra, cycling, polyamide, swim & surf wear, polyester (stretchable), running, ice hockey wear.
- Suitable for flags, banners, felts, gaming tables, home textiles.
- Hard Substrates -- ceramics, metal plates, skis, snowboards.

FEATURES

- 100% sustainable wood pulp, and 100% renewable.
- 100% no brightener added, no chlorine, no emission of harmful gas during the transfer process.
- Double coating, supporting no-membrane fracture, printing with 400% of ink quantity, no penetration on back side, smooth paper surface, no color spot, high print resolution, clear gradation, and wide color gamut.
- Good ink compatibility, high ink tolerance with different surface tensions, supporting industry-level unattended operation.
- Accurate within 2% difference of full width, neat section of coiling block, precise feeding, no warping on both sides, high strength from wet deformation, no deformation even large ink & high-speed printing.
- High ink absorption, rapid drying rate, no extra drying unit required, effectively enhance productivity and low rejection rate.
- High heat stability, no deformation, wrinkle-free, high paper strength, uneasy to break, supporting entire cloth and cut-parts.
- High ink utilization rate and high transfer rate.
- No color aberration in transfer print, and stable color image in case of different drying times.
- Full-course, online and auto control coating, high capacity expansion, and stable quality.

SPECIFICATIONS

Easty Paper	Model (Weight)	Standard Length	Width 3200 (126")	Width 2600 (102")	Width 1950 (77")	Width 1800 (71")	Width 1700 (67")	Width 1620 (64")
